

Using a M10 socket or spanner, unscrew the two mounting clamps from your Logitech Shifter.

Unscrew four phillips head screws to remove the screw clamp bracket from your Logitech Shifter.

The parts you will have removed are pictured.

Mount your Logitech shifter to the alloy bracket using two M6x20mm hex bolts, two M6 washers and the slotted holes indicated (blue if using the shifter on the right hand side, or the green holes if using the shifter on the left hand side).

The Thrustmaster TH8a shifter uses four M6x20mm hex bolts and the inner set of slotted holes (orange or red).

Mount the alloy bracket complete with shifter, to your Sim Chassis at your preferred location.
